a Reliability of the track confidence
raw confidence (ECE 0.101)
temperature-scaled (fold-wise) (ECE 0.059)
fraction of real catheters
candidates per bin
Stage 2B confidence p_m
b Reason-coded decisions at $\tau = 50\%$
kept (p ≥ 50%)
below threshold
duplicate of kept track
n = 1118
n = 673
n = 169
real catheter, kept (1,015)
false track (>3.5 mm)
real, redundant (already covered)
real catheter lost
stitched candidate tracks (1960 across 54 patients)
